

Release Notes TraceNet Sync v1.7.0

Release Category: **Minor**

TraceNet Sync (v1.7.0)

Key Features

- Added the option to set a circuit's control type to Limiter.
- Updated the Ground Fault Samples Before Trip setting:
 - Changed text for Ground Fault Samples Before Trip to read "Ground Fault Delay Before Trip(milliseconds)" to reflect the updated behavior in the DCM firmware.
 - Updated the validation range for Ground Fault Samples to allow for values up to 2500ms.

P.S – Please use this version of TraceNet Sync for Genesis Panel firmware v1.7.0.

Thermon software download portal: <https://www.thermon.com/software-download/>

In case of any issues, please report them at [Genesis Controller™ | Thermon](#) using the 'REPORT ISSUE' link on the page or send an email to ask.me@thermon.com.
