

Thermon Product Lifecycle Announcement

END-OF-LIFE FOR TSM1 CENTRAL MONITORING MODULE

February 28, 2020

Thermon announces the end-of-life (EOL) for TSM1 Central Monitoring Module. The Genesis Controller serves as the replacement for the TSM1 module. TSM1 is no longer available for purchase or supported by Thermon.

The Genesis Controller is a major upgrade in terms of the feature set and functional capabilities as compared to TSM1. It supports control of up to 72 circuits and is certified for both hazardous and non-hazardous locations.

We encourage our customers to contact their local Thermon Sales representative for transition and replacement discussion. You can find more details and information on the Genesis Controller using the below link.
